The advanced working area

## Perfect all around – so that every move is right

HöhleProteus®, the modern supply table for the highest requirements, which gives a new interpretation of functionality. With many practical features such as the generously dimensioned work surface or the ergonomically formed profiles. Choice of materials, machining on the highest technical level and a high degree of individuality reflect a harmony between personal requirements and hygienic supply.

You can always be sure of one thing - our innovation and quality standard with our individual solutions for you. Tailor-made for your needs, for a particularly simple working routine.

## Functionality meets design: The HöhleProteus® – well thought

The complete solution with a docking station includes everything for optimising your work area.

The HöhleProteus® supply table offers functionality for the highest requirements of all. Combined with the ingenious docking device, a boundless, flexible work area is produced. Optional body bars, as well as insert supports serve for hygienic work with the body in accordance with standards. The ergonomically formed enclosure means you can work with no complaints – your back will thank you for it.

The HöhleProteus® trolley stands out for its quiet running and ease of movement. Unique: The steering and braking rollers together with the handle ensure ease when handling.

The standards we set ourselves are high.  
We carry out continuous quality management.  
The reward is our customers' confidence in our products.  
And we work on this daily.

out for a perfect work area

Höhle  
**Proteus®**

The insert supports made of premium steel can be easily taken out. Easy cleaning is therefore guaranteed. Ergonomically formed profiles prevent injuries by pointed edges and corners.

The head rest is also anatomically adapted.

An overview of your HöhleProteus®:

- ▶ high-quality premium steel
- ▶ ergonomically formed
- ▶ large work surface
- ▶ simple operation
- ▶ particularly easy to maintain
- ▶ practical accessories
- ▶ machining on the highest technical level
- ▶ manufactured to measure

HöhleProteus® sets new standards: Your wishes are carried out through CAD development. A perfect solution adapted completely to your needs. Your "Made in Germany" working equipment meets all GMP standards. GMP (Good Manufacturing Practice) is the current standard in the area of hygiene. In cooperation with DEKRA a testing procedure has been developed in order to set the hygienic element of your HöhleProteus® to the highest level. Our forty years of experience is just one building block here and shows that time never stands still. You will receive from us the newest user technology, made to measure, for successful operational procedures.

## The positive effect – the smooth work routine

Good work equipment should work successfully. The individual manufacturing steps guarantee this. Wilfried Höhle Maschinenbau offers successful interaction between technical know-how, innovative design and high-quality manufacturing with the HöhleProteus®. Complete solutions, special preparations and individual parts are provided produced quickly, reliably and carefully. Just as you want it.

Flexibly made to measure: What belongs together comes together here.

The HöhleProteus® **Andock** stands out for its functional design. The medial mounting is impressively smooth-running and has a long, tiltable discharge.

The integrated two-way shifting reduces water and energy consumption by up to 50%.

The trick:

A noticeable resistance, the first shifting position limits the flow quantity by approximately five litres per minute – fully sufficient for hand washing.

Only if the lever is moved further upwards over the resistance does the second shifting position switch on allowing more water to flow.

The docking station is the highlight of the HöhleProteus® series. An all-rounder with many important functions.

So that you know who we are,  
what we can do and what we  
develop for you ... take a look

## HöhleProteus® and HöhleProteus® Andock

## Höhle Proteus®

The HöhleProteus® Andock  
is available with the following  
standard fittings:

- ▶ solid hand shower with  
shut-off  
(3 metre pressure pipe)
- ▶ Wall holder
- ▶ Inserting adapters for  
connecting to the  
hydroaspirator
- ▶ 2 plug sockets (230 V)
- ▶ stable wall and floor bracket
- ▶ side inspection door
- ▶ side tap
- ▶ solid special inlet

Is there anything else you  
would like?

Contact us. We will gladly  
manufacture the  
HöhleProteus® Andock  
especially for you as you  
want it.

Adjustment is child's play.

The HöhleProteus® has a handle which does not only ensure the protective corner radius, but moreover the precise steering of the entire table. When slid into the solid guide the HöhleProteus® latches automatically into the docking station. The connection can be loosened again on both sides and the work area cleaned. It is that simple.

A perfect piece of work needs more than just one tool. It needs individual concepts for showing speed and precision. And Wilfried Höhle Maschinenbau has more than just one idea there. Ask us for solutions.

## Individual with system: Your needs are accurately met

See for yourself that the HöhleProteus® is well planned right down to the details. The integrated tub run-off is located underneath the insert supports. The downward gradient is precisely calculated and ensures speedy drainage. You therefore save time and money.

We also offer some extras for the HöhleProteus® such as the head rest or the aligned body bars.

In addition, you can complete your HöhleProteus® with the following items: Scales, shearing stand, suction, self-cleaning, lifting system, and much more.

### Success in the work area – the practical working aids

Many years of experience, individual concepts and the use of all technical possibilities, are the success factor for our customers on their way up. Take advantage of the new product range of useful working aids, which will make your life easier.

- ▶ HöhleHerkules (body lifter)
- ▶ HöhlePhoinix (cool holding trolley)
- ▶ HöhleJanus (hygiene table)
- ▶ HöhleCalypso (cabinet / shelf system)
- ▶ Shearing table and shearing trolley
- ▶ Coffin and body rack
- ▶ Cooling and intensive cooling store
- ▶ Air sterilisation, odourless

### Decorative highlights

Wilfried Höhle Maschinenbau offers new and creative complete solutions from a single source. For example: Artistic items of decoration for your design.

- ▶ Ecclesiastical art
- ▶ Funeral decoration
